

MATLOCK
ELECTRIC MOTORS

Yesterday's Service.
Tomorrow's Technology.
TODAY.

Yesterday's Quality of Service

Since 1920, Matlock has been combining employee expertise and unparalleled customer service to provide the best electric motor sales and service in the Midwest.

Like we've done for decades, our Service Team of knowledgeable technicians is **available 24/7** for service and sales of a complete line of electrical power needs from our EASA AR100 accredited facility that meet or exceed OEM specifications.

Services We Offer

- Electric motor repair and remanufacturing
- Removal installation and troubleshooting
- Onsite winding
- Laser alignment
- Dynamic balancing
- Onsite balancing
- Vibration analysis
- PDMA testing
- Infrared thermography
- Ultrasonic testing
- DC and AC drive repair, installation and troubleshooting
- Servo motor repair
- Process control and instrumentation
- Application and reliability consultation
- Energy efficiency consulting

We represent many of the most recognized motor and control providers in the industry.

And more! Find a complete list online.

Warranty

We have always firmly believed that the best warranty is the one you never need to use. But we know warranties give peace of mind, so we're still offering the best in the industry.

Remanufacturing	3 years
New Equipment	3 years
Reconditioning	1 year

The Technology of Tomorrow

Our commitment to the quality of service in the past doesn't mean we aren't aware of the future. We're implementing new up to date technology in our state-of-the-art 65,000 square-foot facility. This brand new building doubled our workspace and contains the high-tech tools we need to keep your motors up and running for years to come.

- Machine facility with the equipment for remanufacturing, repair, and manufacturing of new and replacement assemblies
- Computer design rewinding facilities utilizing only high temperature inverter grade magnet wire, class H in-slot and phase insulation
- Our exclusive inverter grade vacuum pressure impregnation (VPI) systems complete our remanufacturing process
- The testing department and procedures ensure all remanufacturing meets or exceeds OEM specifications

Asset Conditioning and Monitoring Services (ACMS)

Not only are we looking toward the future, we're also able to see the future of your equipment. Our certified technicians are trained in predictive maintenance technologies that alert you to needed repairs before your machinery fails. Our team analyzes motor vibration, temperature, shaft alignment, windings and insulation, then uses the test data to inform you of what repairs need to be done so you can schedule them when it is convenient for you.

Focused on Today

It's not just about making things go. It's about staying true to our roots while growing stronger, sharing our innovation with others, and using our knowledge to keep our customers' businesses moving forward today. At Matlock, *we know motors.*
